Scope, methodology and limitations.

Every figure in these pages names the public record it came from and the date it was read. Where a fact has not yet been pulled from the official source, the line says so plainly — nothing here is estimated, assumed or generated.

WITHIN SCOPE	OUTSIDE SCOPE
A reading of the project’s public record: RERA register, company filings, encumbrance trail, statutory rates.	A recommendation to buy, or not to buy.
Source-named and date-stamped, line by line.	A legal title opinion — your lawyer’s opinion remains essential.
Reviewed and signed by a named professional before delivery.	A price prediction, or investment advice of any kind.

Record Grade assessment.

The Record Grade is not investment advice and never says buy or don't buy. It grades one thing: how complete and clean this project's public record is, scored by the fixed formula below – the same formula for every property, printed so you can check the arithmetic. This copy shows a **provisional** grade: 4 checks worth 50 points are completed only in a commissioned report.

Pre-purchase due-diligence checklist.

-
- 01 Ask for the RERA registration certificate and match its number with the register entry cited on page 3.
-
- 02 Have your lawyer read the Encumbrance Certificate for the full period, not a summary of it.
-
- 03 Compare the quoted price with the Kaveri guidance value for the survey number — a large gap in either direction deserves a question.
-
- 04 Confirm which area the price is quoted on: carpet, built-up or super built-up. RERA requires carpet area in the agreement.
-
- 05 Ask for the occupancy certificate timeline in writing, and what the agreement says if it slips.
-
- 06 Verify the khata classification and property-tax status with BBMP before registration.
-
- 07 Confirm GST treatment for your unit's stage of construction against the rates on page 7.
-
- 08 Never treat this report, or any report, as a substitute for your own lawyer's title opinion.
-

Certification, methodology and references.

Method: every fact is read from the named public source on the date shown, kept verbatim, and reviewed by the undersigned before delivery. Where a record could not be obtained, the line says "pending" rather than guessing. Sources used: Karnataka RERA register · Kaveri 2.0 (guidance values, EC) · MCA master data · RBI HPI / NHB Residex · official rate notifications.
